TITLE : ELECTRONIC BLACKBOARD DEVICE

ABSTRACT : PURPOSE: To attain data correction and addition mutually between plural electronic blackboard by adopting the constitution that a display function and an input function are providing to each electronic blackboard and the display data are to be exchanged.

CONSTITUTION: Electronic blackboards 7a, 7b are set in the master side and slave side respectively, then a master computer 11a stores the information from the blackboard 7a into the own memory 10a and transferred to the slave memory 10b. In changing pattern information of the display device 8 from the slave blackboard 7b, the slave computer 11b gives a change request of the own memory 10b to the master computer and when the request is recognized, the change information is stored in the memory 10b. The slave computer 11b stores the new change information in the sub memory area until the command of change permission comes from the master computer 11a.
